Game Identity:

A cozy point-and-click escape room game where the player solves different puzzles inside a locked room to find cat food and feed the cats in order to escape.

Design Pillars:

Puzzle solving. Mystery. Curiosity.

Genre/Story/Mechanics Summary:

This game is a point-and-click escape room game. The player is trapped inside a room and must observe and interact with the room to find clues and solve different puzzles.

The player can interact with objects by clicking on them. Some objects are picked up and put in inventory to be used later in a different area and other objects are simply examined to find clues.

The main objective is to find cat food and feed the two cats in the game. Once the cats are fed the player can escape the room.

Features:

- Point-and-click
- Puzzles with codes obtained from the environment
- Objects can be interacted with
- Overall linear progression - parts of one puzzle may be solved in any order but one puzzle has to be solved in order to get to the next puzzle
- Cats react to getting fed
- Fed cats can be petted

Interface:

Player will use mouse for input

- Left click - interact with objects and investigate areas
- Clicking on object - examine, pick up or interact
- Clicking on an area - zoom in on area
- Click on arrow (on screen) - turn to other wall

Art Style:

Simple 2D illustrated style. The room should feel small and somewhat mysterious.

Close-up of an area will be more detailed than the full view. Shapes and lines will make it clear what objects can be interacted with.

The style inspiration is from games like *Rusty Lake: Cube Escape* and *Unpacking*. The vision for the style is a combination of the lighter vibe and colour palette from *Unpacking* and the 2D design from *Rusty Lake*.

Music/Sound:

There will not be background music playing during the game. Cats will meow from time to time. Happy music may begin playing after the cats are fed and the escape becomes available to show the player has reached the end.

Sound effects will occur when player interacts with objects:

- Creaking sounds while opening drawers and doors
- A sound when unlocking a door with a key or trying to open a locked door
- Entering a correct or incorrect code
- Picking up items
- Opening cat food
- Other object-specific sounds as objects are added to the game
